Project Name	Global Fuel Prices and Taxation Trends (2020·2025)
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	**Stage 1**	**Stage 2**	**Stage 3**
Actions *What does the customer do?*	Searches online for fuel prices Looks for country comparisons Identifies fuels of interest	Opens the Tableau dashboard Selects relevant chart or filter Views petrol, diesel and LPG charts	Compares prices and tax rates Checks crude-oil trends Reviews differences across regions
Touchpoint *What part of the service do they interact with?*	Search engines and data sources CSV/Excel fuel dataset Fuel price information	Published Tableau Public link Interactive charts and filters Dashboard titles and legends	Country/region comparison charts Brent crude oil trend chart Tax percentage visualizations
Customer Thought *What is the customer thinking?*	Where are fuel prices highest? Why do prices differ? Can I compare fuels easily?	Do prices change by year? How does tax vary by country? What does the chart show?	Which countries differ most? Are there visible trends? Can I explain the findings clearly?
Customer Feeling *What is the customer feeling?*	Curious but unsure where to start Confused by scattered information Interested in a clear comparison	More focused when charts are clear May need help with labels/filters More confident exploring data	Informed by visual comparisons Satisfied if trends are understandable Aware of data limitations

Process Ownership *Who is in the lead on this?*	Project owner / data preparer	Tableau dashboard designer	Dashboard user / reviewer
Opportunities *How can we improve this stage?*	Use one organized dataset Check missing values Show units and data period	Keep titles and legends clear Make filters easy to find Avoid crowded charts	Explain key comparisons Refresh verified source data Mention data limitations
